

## IMPROVING REGULATION BY ESTABLISHING PARTNERSHIP BETWEEN GOVERNMENT AND BUSINESS

December 2018

# BRDO INTELLIGENCE FACTS, OPINIONS, ANALYTICS

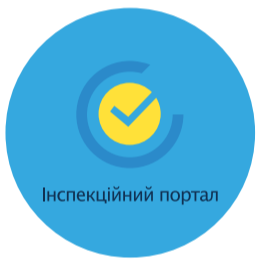

### DECISIONS FOR BUSINESSES

Long-awaited amendments to the resolution of the Cabinet of Ministers 1548 on deregulation in pricing were published. From now on, the regulation of prices and tariffs for the following services are cancelled:

- testing services for buses converted from other means of transport to confirm their compliance with safety requirements;
- the development of land surveying documents and the execution of land evaluation works as well as the registration of their results in electronic form (exchange file creation);
- the execution of land surveying works in case of free transfer of land plots to citizens of Ukraine in accordance with the legislation;
- services related to electronic digital signatures. Read more [here](#).

Connection to electrical networks is one of the main obstacles to the development of Ukrainian business and a negative factor that discourages international investors to invest in the country. A new method to determine the non-standard connection cost developed with the participation of BRDO experts should improve this situation. Read more [here](#).

The Government adopted risk assessment criteria to establish state price regulation by the State Food Safety Service. Read more [here](#).

### INSPECTION REFORM

The BRDO Office started transferring the Inspection portal to the State Regulatory Service. The Inspection portal is a full-fledged independent tool of the system of state supervision and control measures. Currently, 27 of 33 inspection bodies have joined the work and published information about their inspections on the Inspection Portal [inspections.gov.ua](http://inspections.gov.ua). Details [here](#).

### BRDO INITIATIVES

A key issue for Ukrainian business and international investors is raider attacks. Since 2014, more than 1,700 raider attacks have been recorded, and there were more than 500 such cases only in Kyiv and the region. A draft law No.9311 #RaidingStop developed by the Ministry of Justice together with the BRDO, ACC, EBA, SUP and the Business Ombudsman Office can improve the situation. Read more [here](#).

Every year, 800 thousand individuals and legal entities register 1 million state-owned and municipal land plots in Ukraine. However, the legislation was developed in such a way that it is almost impossible to register a land plot without violations, and this procedure is corrupt, cumbersome, non-transparent and long-lasting. The government, business, public and expert community representatives discussed these issues and other problems in this area during the Roundtable "Land development and allocation for new construction projects."

The BRDO Office together with the government, business, public and expert community representatives discussed e-commerce problems at the roundtable "E-commerce: Smart Regulation for a Progressive Market". Key BRDO's proposals were prepared based on the Green Paper "E-commerce Market". Read more [here](#).

**THANK YOU FOR BEING WITH US ALL THIS YEAR!  
WISH YOU A MERRY CHRISTMAS AND A HAPPY NEW YEAR!  
SEE YOU IN 2019!**

# IMPROVING REGULATION IN UKRAINE

BRDO is an independent think tank. Our mission is to promote better regulation and economic freedoms in Ukraine with a focus on SMEs as key drivers of growth. BRDO's reform efforts are supported by a growing number of partners and donors, including its key partner - the European Union, supporting BRDO through the FORBIZ project in Ukraine, financed within the EU4Business initiative. Highlights include almost a thousand abolished outdated and/or illegal acts, support of 6 Deregulation Sessions of the CMU, where more than a hundred business regulations were amended, and more than 40 new ones adopted. Millions of euros every year are saved by businesses in Ukraine thanks to regulatory improvements initiated, drafted and advocated by BRDO. BRDO's reform network spans a growing number of partner organisations, which ensures BRDO's independence from political forces and allow BRDO to be a reliable and impartial institution driving positive systemic changes in Ukraine.
