

BETTER REGULATION DELIVERY OFFICE 2022

BRDO is an independent think tank, a key platform for united reforms organisations which share values to implement changes. We develop public policies to transform Ukraine into a European democracy with good governance and a strong economy.

7 YEARS OF ACTIVITY:

75

policy papers
(fitness checks)

211

adopted (co-)drafted
legislative acts
implementing policy
recommendations

1245

abolished legislative acts
identified to be outdated
and/or illegal

6

award-winning
digital tools
used by SMEs, inspectors
and regulators

When the full-scale Russian invasion of Ukraine began, we all had to review our professional activities. Developing policies, drafting laws, and working on digital business solutions seemed initially invalid. However, with time it became evident that our reforms and initiatives maintained their relevance, and new challenges faced by Ukraine today amid the war, force us to open a new area of activity — the military one. To simplify the import of UAVs and other military goods, to provide evacuation of state registers, to launch a nationwide "Shelter" portal, to create a new register of damaged and destroyed property, to help businesses with wartime adaptation, and to prepare for future reconstruction of Ukraine — we added these tasks to the BRDO agenda. Most importantly, Ukrainian institutions keep working and proving their resilience daily, and we cooperate with the state to guarantee its continuous development.

Oleksii Dorohan
CEO

The European Commission highly evaluated BRDO's work in its annual report "Association Implementation Report on Ukraine":

“Ukraine continued to pursue effective reform of state policy promoting a favourable business environment and regulatory framework, especially for SMEs. The Better Regulation Delivery Office (BRDO) remains instrumental in deregulation reform and improvement of the business regulatory environment.”

CONSTRUCTION

Developments in the following reforms

- Reconstruction of settlements (territories) affected by the armed aggression of the Russian Federation
- Automation of the provision of public (administrative) services

The concept of recovery management e-system — DREAM (Digital Restoration Ecosystem for Accountable Management). Capable Ukrainian institutions, decentralisation, open data and digital tools are the basis of the transparent and effective reconstruction of Ukraine. The principles and design of the DREAM system take into account all the key requirements for reconstruction, contain safeguards against corruption, and dictate rules for its implementation. The launch of DREAM will provide a solid foundation for Ukraine's reconstruction.

in partnership with
