# CREATION OF A UNIFIED STATE REGISTER OF SERVICEMEN — A NEW DRAFT LAW IS ALREADY IN THE PARLIAMENT

Draft Law No. 12066 on amendments to the Law of Ukraine “On Military Duty and Military Service” regarding the creation and functioning of the Unified State Register of Servicemen was registered in the Parliament. This document is aimed at improving the procedure for maintaining military records and protecting personal data of servicemen. The draft law was developed with the participation of experts of the Better Regulation Delivery Office. It provides for the creation of a unified database for military personnel of the Armed Forces of Ukraine and the State Special Transport Service and a unique electronic identifier Military ID, which will allow data exchange between registers without using personal data of military personnel. It is important that the register will not contain information on military service, rank or speciality. Sensitive data will be stored in secure circuits of other information systems and, if necessary, can be depersonalised using the Military ID instead of using first and last names.

# GOVERNMENT APPROVED A NEW VERSION OF THE DEREGULATION ACTION PLAN

The Cabinet of Ministers of Ukraine has approved a new version of the step-by-step plan to accelerate deregulation. It is based on the decisions of the Interdepartmental Working Group on Accelerated Review of State Regulatory Instruments for Business (IWG on deregulation) to cancel or optimise instruments, developed jointly with experts and with consideration of business requests. These changes are aimed at easing the conditions for entrepreneurs and creating a favourable environment for business development in Ukraine. The plan contains not only 100 tasks and 140 step-by-step measures, but also clear deadlines for the authorities to cancel, simplify or improve the instruments they manage. Better Regulation Delivery Office (BRDO) joined the work of the IWG within the EU4Business: SME Policies and Institutions Support (SMEPIS) project, implemented by Ecorys in a consortium with GIZ, BRDO and Civitta with the financial support of the European Union.

# FOR THE FIRST TIME, UKRAINIAN MANUFACTURERS OF DRONES WILL BE ABLE TO PARTICIPATE IN THE DRONE COALITION'S TENDERS WITHIN THE RAMSTEIN FRAMEWORK

This is an important step to support national production and strengthen defence capabilities. Tenders include two lots: FPV drones – bids are accepted until 14 October, interceptor drones – bids are accepted until 11 November. Large-scale production of FPV drones and interceptor drones will create a technological advantage over the enemy. The Drone Coalition has accumulated €50 million for the purchase of equipment. It is planned to purchase 20-30,000 drones, which will significantly enhance defence capabilities. The BRDO team developed a model for engaging Ukrainian companies and facilitated its coordination with the member countries of the Drone Coalition. This project was made possible thanks to the leadership of the Minister of Defence of Ukraine Rustem Umerov and Deputy Minister of Defence for Digitalisation Development Kateryna Chernohorenko.

# THE ELECTRONIC SYSTEM OF PERMIT DOCUMENTS EPERMIT WAS LAUNCHED

On 18 September, the Unified State Electronic System of Permit Documents (ePermit) was officially launched, allowing entrepreneurs to obtain licences and other permits in electronic form. The first service is already available in the system – registration of the declaration of compliance of the material and technical base with the requirements of labour protection legislation. The ePermit project is implemented by the Ministry of Economy of Ukraine in partnership with the Ministry of Digital Transformation of Ukraine funded by the European Union under the EU4DigitalUA project, implemented by FIIAPP. The project is also supported by DT4UA, which implements the E-Governance Academy. Advisory support for the development of regulations for the system is provided by the EU4Business: SME Policies and Institutions Support (SMEPIS) project implemented by Ecorys in a consortium with GIZ, BRDO and Civitta with the financial support of the European Union. The Digital Transformation Support Project with support from USAID and UK Dev provides a full cycle of ePermit implementation. The implementing partner is the BRDO.

# “ECONOMIC POLICY OF UKRAINE: RECOVERY DURING THE WAR” THE MINISTRY OF ECONOMY PRESENTS KEY PROJECTS AND DIRECTIONS

The Ministry of Economy of Ukraine highlighted the key areas of work and strategies to overcome the challenges caused by Russia’s full-scale invasion during the event held on September 16, 2024. During the event the SME Recovery Strategy for 2027 was presented. The government-approved document outlines the main directions of state policy in the SME sector, including rebuilding destroyed enterprises following the “build back better” principle. In addition, the new Pulse platform, designed to enhance interaction between the state and business, and the ePermit electronic system, designed to convert procedures for issuing permits for business into electronic form, were presented.

# UPDATED DIIA.BUSINESS PORTAL: A POWERFUL TOOL FOR ENTREPRENEURSHIP DEVELOPMENT

The national project Diia.Business has presented an updated portal that will strengthen support for entrepreneurship in Ukraine and abroad. From now on, Diia.Business offers users a unique trajectory depending on the type of business and the stage of its development. Entrepreneurs can quickly and easily find all the information they need, from finding an idea for starting a business to entering foreign markets. The development of the updated Diia.Business portal was initiated by the Ministry of Digital Transformation of Ukraine and the Entrepreneurship and Export Promotion Office within the framework of the EU4Business project: SME Policies and Institutions Support (SMEPIS) project, implemented by Ecorys in consortium with GIZ Ukraine, BRDO and Civitta and funded by the European Union in Ukraine.
