COMPENSATION FOR DAMAGED AND DESTROYED PROPERTY: COMMISSIONS WILL BE CREATED TO CONSIDER THE ISSUE OF PROVIDING SUCH COMPENSATION

Last week, the CMU approved the resolution “Some issues of organising the work of the commission for consideration of issues of compensation for real estate destroyed as a result of hostilities, acts of terrorism, sabotage caused by the armed aggression of the Russian Federation against Ukraine.” In accordance with it, the Model Regulation on the Commission for consideration of issues of compensation for real estate destroyed as a result of hostilities, terrorist acts, and sabotage caused by the armed aggression of the Russian Federation against Ukraine is approved. This Regulation defines the legal basis for the creation and functioning of commissions that will consider the issue of providing such compensations. BRDO experts also participated in the development of the resolution. [Read more](#) about how the commissions will be formed, what functions they will perform, who will be able to join the commissions.

THE GOVERNMENT APPROVED THE PROCEDURE FOR BUG BOUNTY IN UKRAINE

Ukraine fights the Russian Federation, in particular, in cyberspace. To ensure this, in March 2022, the Parliament of Ukraine made changes to the Criminal Code of Ukraine, which decriminalised interference in the work of information systems with the aim of finding vulnerabilities in them. In other words, the Parliament allowed the work of white-hat hackers, or ethical hackers, to find vulnerabilities, in particular, in government systems. The document defines the procedure for organizing, searching, and identifying potential vulnerabilities of information systems based on a public offer. We are talking about any systems for which the owner will decide on the need to place a public offer on the search for vulnerabilities: from the information systems of state registers to, for example, the information system of the city water utility. Details – in our [press release](#).

LOGGING TICKETS AND CERTIFICATES ON THE ORIGIN OF WOOD – TWO MORE SERVICES OF THE MINISTRY OF ENVIRONMENT WILL BE PROVIDED ONLINE FROM NOW ON

The government agreed to the proposal of the Ministry of Environment and the Ministry of Digital Transformation regarding the experimental project of issuing a special permit for the use of forest resources (logging ticket) and a certificate of origin of timber and lumber made from it. The project will be implemented for 2 years, starting from June 1, 2023. From now on, it is possible to submit an application and obtain the relevant permit documents online on the [Ecosystem](#) platform. BRDO experts worked on the digitisation of these services together with the Ministry of Environment and the State Forestry Agency within the framework of the USAID/UKaid project “Transparency and Accountability in Public Administration and Services/TAPAS”. [Read more](#) on the history of the reform and what is planned in the future.

THE MINISTRY FOR RESTORATION AND THE RISE UKRAINE COALITION PRESENTED THE COMMUNICATION PLATFORM OF THE DIGITAL ECOSYSTEM FOR RECONSTRUCTION MANAGEMENT DREAM

Ministry for Communities, Territories, and Infrastructure Development of Ukraine (Ministry for Restoration), together with the RISE Ukraine Coalition, presented the communication platform of the unified electronic restoration management ecosystem DREAM (Digital Restoration Ecosystem for Accountable Management). The communication platform is available via the link <https://dream.gov.ua/> and contains information about the tasks, structure, and principles of the DREAM ecosystem, as well as a step-by-step plan for its implementation in 2023. Details on what is DREAM, how it will work, and how it was possible to implement are available [here](#).

THE GOVERNMENT HAS APPROVED THE STATE STRATEGY FOR THE DEVELOPMENT OF THE FISHERIES SECTOR UNTIL 2030

The Cabinet of Ministers of Ukraine approved the State Strategy for the Development of the Fisheries Sector until 2030 by its Order No. 402 of May 2, 2023. The Government also approved the operational plan of measures for its implementation in 2023-2025. The document was developed by specialists of the Ministry of Agrarian Policy and Food of Ukraine and the State Agency of Reclamation and Fisheries of Ukraine together with the Office of Effective Regulation of BRDO, as well as representatives of scientific circles and public organisations. The purpose of developing the Strategy is to ensure the sustainable development of the fishing industry of Ukraine. We [explain](#) why Ukraine needs this document and what are the expected results.

WHY WILL THERE BE NO RECOVERY AND EUROPEAN INTEGRATION WITHOUT DIGITISATION?

Russia's war against Ukraine is not just a local conflict. To stop this act of aggression and prevent it from happening again, we need to do more than just defend ourselves. Ukraine should focus on effective recovery and completing its path to full EU integration, two processes that are closely intertwined. The reconstruction of Ukraine after a full-scale war is an unprecedented, complex, long-term project, and digital tools are necessary to ensure its success. How digital transformation can support transparent and accountable recovery efforts, and why digitisation is also crucial for the transformation of our state into one of the EU countries? Read the article by Ihor Samokhodskyi, Head of the “IT&Telecom” sector of BRDO, to find answers. The full text of the article published can be found in the European Liberal Forum monthly issue “[Designed in Brussels, Made in Ukraine: Future of EU-Ukraine Relations](#)”, page 97.

WHAT IS DEREGULATION?

At the beginning of 2023, more than 1,000 instruments were operating in the sphere of state regulation of economic activities. Ukrainian entrepreneurs are obliged to constantly obtain or submit a bunch of licenses, permits, reports, declarations, and approvals. Not all of these regulatory instruments still make any sense. Accordingly, in January 2023, an Interdepartmental Working Group on Issues of Accelerated Review of State Regulation of Economic Activity – Working Group on Deregulation was established. What is deregulation, why Ukraine needs it, how is it implemented, and what is BRDO for in this process? Read more about it and about the results of the first 4 months of work of the IWG in the [column](#) of Oleksiy Sobolev, Deputy Minister of Economy.

DEREGULATION CONTINUES – THE RESULTS OF THE WORK OF THE IWG ON DEREGULATION IN MAY

The Interdepartmental Working Group on Issues of Accelerated Review of Instruments of State Regulation of Economic Activity (IWG on Deregulation) has started its work in January 2023. BRDO prepares analytics on the necessity of maintaining or cancelling regulations, the priority of digitization of state regulatory tools, participates in meetings and helps to implement the decisions of the IWG, in particular, to develop legal acts. In May, the following recommendations were developed:

1. cancel or optimise state regulatory instruments related to [land issues](#) – in particular, get rid of 17% of such instruments that belong to the sphere of competence of the Ministry of Agrarian Policy and Food, and 25% of the instruments that are taken care of by the State Property Fund;
2. cancel or modernise [12 instruments of state regulation from 6 spheres](#): general regulatory rules, agriculture, construction, medicine, transport, and recovery.

The IWG is headed by First Deputy Prime Minister – Minister of Economy of Ukraine Yuliia Svyrydenko and Deputy Prime Minister – Minister of Digital Transformation Mykhailo Fedorov. The meetings are also attended by representatives of leading analytical centres, in particular the BRDO.
